Product Overview Catalogue
Clipsal Australia first started from humble beginnings in 1920, with a range of adjustable conduit fittings that ‘clips all’ sizes of conduit, thus the name Clipsal was born. Almost 90 years on, Clipsal has become one of the leading producers of electrical products in its field.

As a company and brand, Clipsal has continuously developed and evolved to meet the needs of commercial and domestic building electrical requirements. Development in building automation products led to the formation of CIS (Clipsal Integrated Systems) in 2000, a business unit of Clipsal Australia specialising in the manufacture of electronic lighting control and building automation products. Since then CIS has grown rapidly, gaining widespread acceptance in major commercial and domestic markets.

Through extensive research and design, CIS developed the C-Bus® Lighting Management System in 1994, and since then C-Bus has become the cornerstone of CIS’ product range. Initially, C-Bus was designed and manufactured for commercial building applications. However, due to increasing worldwide interest, C-Bus was adapted to suit the domestic market with the release of C-Bus DIN Rail Series and associated products.

With the development of C-Bus for domestic application, a new generation of products was born including the C-Touch™ touch screens, Neo® wall switches, and Saturn™ wall switches.

The C-Bus Saturn range of wall switches have proved a real ‘head turner’, manufactured from handcrafted glass with bevelled edges, and apertures cut for its distinctive circular, backlit buttons.

CIS continue to set new precedents by expanding the C-Bus range. Introducing products such as the modular Architectural and Professional ranges of High Powered Dimmers, C-Bus Wireless Technology, Dynamic Labelling Technology (DLT™) and the C-Bus Multi-Room Audio system. Not only is the C-Bus product range extensive, but it also complies with international product certification requirements such as the C-Tick, CE and UL marks.

CIS have also recognised the changing requirements for control systems in commercial buildings, particularly with regards to the need to provide clients with one integrated control solution. CIS have created interface platforms for C-Bus such the BACnet Gateway, DALI Gateway and OPC Server to meet this integrated solution need.

CIS is committed to ensuring the end-user gets the most out of every C-Bus system. To assist in meeting this commitment, CIS has created the following C-Bus installer programs.

**C-Bus® Approved Installer Program**

C-Bus® Approved Installers have been trained and accredited by Clipsal as specialists in C-Bus technology and its application. This is the first stage in the C-Bus accreditation process and can lead to pointOne or Platinum Partner status.

From system design, through to installation, then to programming and commissioning, a C-Bus Approved Installer will ensure that your C-Bus system reaches its full potential, delivering the best performance, functionality and most of all, value for money.

Any building, whether it’s a home or a commercial site, is a big investment. Don’t risk compromising the outcome with just anyone. Insist on a C-Bus Approved Installer and get confidence and peace of mind in knowing that you have the backing of Clipsal, Australia’s number one in electrical building products.

**C-Bus® pointOne Program**

C-Bus® pointOne is a group of specialist systems integration companies that have the technical knowledge and practical experience on a whole range of complimentary technologies to enhance the functionality of your residential premises. The one point of contact, C-Bus pointOne members make residential lighting control and automation applications an easier process. They do this by providing turnkey solutions for the design, project management, installation, integration, programming and support of Clipsal C-Bus and integration with products from third party manufacturers.

C-Bus pointOne members are accredited integration professionals, who have been trained in all aspects of the Clipsal C-Bus system, with some having over 30 years of industry experience.

**C-Bus® Platinum Program**

The aim of the C-Bus Platinum program is to link Clipsal clients who have a commercial building project to a network of professionals who are able to successfully deliver a complete C-Bus Control and Management System, including integration to other building services. From design to integration, installation and programming, C-Bus Platinum partners can assist commercial developers, consultants and designers throughout the project delivery process. This ensures a smooth delivery process with the highest quality C-Bus installation for your commercial building.
Introduction

The Clipsal C-Bus® system is a microprocessor based wiring system to control lighting and other electrical services.

Whether ON/OFF control of a lighting circuit or analogue type control such as dimming electronic fluorescent ballasts, C-Bus® can control and automate virtually any type of electrical load.

To ensure fast and reliable operation, each device has its own in-built microprocessor, which can be individually programmed via ‘point and click’ PC based software, or via ‘Learn Mode’ which doesn’t require a PC.

C-Bus® information is held within individual C-Bus® units rather than one central point. This ensures optimum communications speed and reliability.

Whilst a computer is unnecessary for normal C-Bus® operation, C-Bus® PC based control and management software is available and provides additional flexibility to clients requiring this type of control.

Clipsal C-Bus® is suitable for a wide range of applications, for example.

Commercial Lighting Control
- Fluorescent lighting control for energy cost saving in high rise buildings
- High-bay control in warehouses for energy cost saving
- Mood lighting in restaurants and retail outlets
- Flexible and integrated control of lighting and Audio Visual equipment in board rooms
- Architectural lighting control for hotel foyers, ballrooms, art galleries and museums.

Standalone Room Lighting Control
- Integrated automation via touch screen user interfaces for conference rooms and home theatres
- Multiple scene / mood setting.

Residential Automation
- Home entertainment - Integrated audio visual, lighting control, and other electrical services
- Security - Integrated security, lighting and other electrical services
- Comfort – Dimming, scene setting
- Convenience – Multiple point control, central point control from touch screens, automated time based control, automated ‘Goodbye’ and ‘Welcome Home’ moods.

C-Bus® Network Design Considerations

- Up to 1000m of C-Bus® Cat 5 UTP cable may be connected to a single C-Bus® network
- Up to 100 C-Bus® units may be connected to a single C-Bus® network
- Where more than 1 km and/or 100 standard C-Bus® units are required, two or more networks can be created and linked with C-Bus® Network Bridge and/or C-Bus® Ethernet Interface Units
- Maximum number of networks in one installation is 255 (this limitation does not apply if a C-Bus® Ethernet Interface is utilised, the system size is then limited to IP Addressing only)
- Maximum number of networks connected in series to the local network via Network Bridges is seven (i.e. using six network bridges)
- Each standard C-Bus® unit requires 18mA @ 36Vdc to operate correctly. Some C-Bus® units, e.g. 5500PC require 32mA. Some C-Bus® units, e.g. L5108D1A are self-powering and do not take current from the 36V d.c C-Bus® network
- More than one C-Bus® power supply can be connected to a C-Bus® network to provide sufficient power to the C-Bus® units, the C-Bus® power supplies will share the load evenly. Maximum total power supply allowed is 2,000mA (2A)
- Any combination of power supply units is allowed as long as the total power available is 2,000mA or less
- Each C-Bus® network requires only one network burden. This network burden is software selectable on C-Bus® output units
- Each C-Bus® network requires at least one system clock-generating unit (for data synchronisation)
- C-Bus® power supply units may be connected to different phases
- Individual relay channels may be connected to different phases
- On L5508D1A and L5504D2A units the mains supply to the units power supply and the mains supply to the output channels must be on the same phase
- The isolation between the mains supply circuitry and the 36V d.c. C-Bus® circuitry is greater than 3.75kV. This is achieved using double wound transformers and opto isolators. This means the C-Bus® wiring, connections and circuitry can be considered extra low voltage
- C-Bus® Cat 5 UTP cable has mains rated sheathing which means the C-Bus® cable can be taken inside electrical Distribution Boards, provided segregation requirements of local wiring standards are met.
C-Bus® Device Categories

Input Devices
- Wall Switches
- Occupancy Sensors
- Environment Sensors
- Touch Screens
- General Inputs
- Hand Held IR Remotes

Output Devices
- Professional Dimmers
- Din Rail Dimmers
- Din Rail Relays
- Fluorescent Controllers
- Infra-red Transmitters

System Devices
- Network Support Devices
- Controllers
- Gateways

PC Software
- Commissioning Tools
- Graphical User Interfaces
- Gateways and Drivers

Multi-room Audio Devices
- Matrix Switchers
- Amplifiers
- Speakers

Wireless Devices
- Wall Switches
- Plug Adapters
- Gateways
- Hand Held Remotes

Security Devices
- C-Bus Security Panel
- Security Keypads
- Security Accessories

Typical C-Bus® wiring schematics are shown on pages 98 & 99
Dynamic Labelling Technology™

- Available in Saturn™ and Neo® styles
- Saturn units feature an impact resistant glass fascia available in white, black, cream and mid-brown
- Saturn unit also available with stainless steel fascia
- Neo units available in grey with brushed aluminium look inner surround
- Units incorporate eight buttons for C-Bus® Group/Scene over two pages (four buttons per page)
- Page/scroll button
- Each button can be programmed with on, off, toggle, dimmer, timer, scene control and custom functions
- LCD labelling for each button
- Text, sliders and bitmaps can be defined and downloaded to the unit via a C-Bus® network.
- Dimmable blue LED on each button
- Nightlight on all buttons or just the bottom button
- 64 x 128 pixel LCD screen
- Dimmable white LED backlighting for the LCD
- Ignore first button press option
- Fallback to page 1 option
- Real time clock display
- Programmed via C-Bus® Toolkit software
- Draws 22mA from the C-Bus® network
- C-Bus® learn enabled.

DLT™ - Saturn - rectangular series

5085DL-J80
Wall switch 5 button, DLT™, stainless steel

5085DL-PW
Wall switch 5 button, DLT™, pure white

5085DL-GF
Wall switch 5 button, DLT™, white

5085DL-680
Wall switch 5 button, DLT™, black

5085DL-380
Wall switch 5 button, DLT™, cream

5085DL-780
Wall switch 5 button, DLT™, mid-brown
DLT™ - Neo® - rectangular series

5055DL.GB
Wall switch 5 button,
DLT™, battleship grey

5055DL.WE
Wall switch 5 button,
DLT™, white
Saturn™ C-Bus® Wall Switches

- Impact resistant glass fascia, available in pure white, white, black, cream and mid-brown
- Available with stainless steel fascia
- 2, 4 or 6 buttons per wall switch
- Programmable as on, off, toggle, dimmer, timer, scene control and custom functions
- Selectable blue and orange LED indicator on each button configured through C-Bus® Toolkit software
- LED button indicators provide illumination and status feedback
- Nightlight feature
- Fall back level option to dim indicators at a set time after the last button press
- Mounted using standard mounting accessories (ordered separately)
- Programmed via Learn Mode or the C-Bus® Toolkit software
- Draws 22mA from the C-Bus® network
- C-Bus® Learn Enabled.

Saturn™ - rectangular series

508xNL-J80
Wall switch, rectangular, stainless steel

508xNL-PW
Wall switch, rectangular, pure white

508xNL-680
Wall switch, rectangular, black

508xNL-380
Wall switch, rectangular, cream

508xNL-780
Wall switch, rectangular, mid-brown

'x' denotes number of buttons i.e. 2, 4 or 6 button
Saturn™ - accessories

5080LC-8
Pre-labelled button caps individually printed with commonly used labels (pack of 66)

Saturn™ - Mounting frames

5850F,WE
Mounting frame, rectangular, white (pack of 5)

This mounting frame accessory can be used in conjunction with C-Bus® Saturn wall switches to provide an alternative look to the switch edge for blending in with the client's wall colour.
Modena C-Bus Wall Switches

- Available in white (WH) and black (BK)
- 2, 4 or 6 buttons per wall switch
- Programmable as on, off toggle, dimmer, timer, scene control and custom functions
- Selectable blue and orange LED indicator on each button configured through C-Bus® Toolkit software
- LED button indicators provide illumination and status feedback
- Nightlight feature
- Fall back level option to dim indicators at a set time after the last button press
- Mounted using standard mounting accessories (ordered separately)
- Programmed via Learn Mode or the C-Bus® Toolkit software
- Draws 22mA from the C-Bus® network
- C-Bus® Learn Enabled

Modena - Series

LCH882.WH
Wall switch 2 button, White

LCH884.WH
Wall switch 4 button, White

LCH886.WH
Wall switch 6 button, White
Avanti C-Bus Wall Switches

- Rockers are a long throw momentary action type (‘spring return’)
- Available in 1, 2 or 3 buttons per wall switch in white only
- Programmable as on, off toggle, dimmer, timer, scene control and custom functions
- Selectable red and green LED indicator on each button configured through C-Bus® Toolkit software
- LED button indicators provide illumination and status feedback
- Nightlight feature
- Fall back level option to dim indicators at a set time after the last button press
- Mounted using standard mounting accessories (ordered separately)
- Programmed via Learn Mode or the C-Bus® Toolkit software
- Draws 18mA from the C-Bus® network
- C-Bus® Learn Enabled

Avanti - Series

5091NL,WE
Wall switch 1 button, White

5092NL,WE
Wall switch 2 button, White

5093NL,WE
Wall switch 3 button, White
Neo® C-Bus® Wall Switches

- Architecturally designed, modular C-Bus® wall switches
- Optional rocker cover with ID window for labelling of buttons (ordered separately)
- Backlight for ID windows
- 2, 4 or 8 buttons per wall switch
- Integral infrared receiving window
- Programmed via C-Bus® installation software or via the learn mode features
- Programmed as dimmers, timers, on/off toggle switches and scene switches (up to 4 scenes per unit)
- Selectable blue and orange button LEDs configured through C-Bus® Installation Software
- Available as standard in Battleship Grey (GB), White Electric (WE), Cream (CM), Desert Sand (DS), Soft Grey (SG) and Black (BK)
- Night-light feature
- Units use standard Australian mounting brackets and wall boxes
- Units draw 22mA from a C-Bus® network
- C-Bus® Learn Enabled.

Neo® - rectangular series

5052NL,GB
Wall switch 2 button

5054NL,GB
Wall switch 4 button

5058NL,GB
Wall switch 8 button
Neo® - accessories

5038TX2
Neo® 8 button, hand-held infrared remote control, for Neo® switches (also suits C-Bus® 30M Wall Switches, C-Bus® Multisensor and 503xNIRL series wall switches)

5052NRI
Neo® rocker cover with ID window (pack of 10)
Reflection™ C-Bus® Wall Switches

- Architectural, flat stainless steel C-Bus® wall switches
- No visible screws
- 1, 2, 3, 4, 6 or 8 buttons per wall switch
- Available in brushed stainless steel
- Each button has an associated blue LED indicator providing feedback status
- Programmed as dimmers, timers, on/off toggle switches and scene switches (up to 4 scenes per unit)
- Programmed via C-Bus® installation software or via the learn mode features
- A custom wall box is required to mount this switch, standard wall brackets and boxes can not be used
- Units draw 22mA from a C-Bus® network
- C-Bus® Learn Enabled.

Reflection™

R5061NL
Wall switch 1 button

R5062VNL
Wall switch 2 button

R5063NL
Wall switch 3 button

R5064VNL
Wall switch 4 button
2000 Series C-Bus® Wall Switches

- **R5066NL**
  Wall switch, 6 button

- **R5068NL**
  Wall switch, 8 button

---

**Reflection™ - accessories**

- **R5060WB**
  Wallbox to suit Reflection™ range of wall switches
  Important note: This wall box must be used to install Reflection™ Wall switches

---

**Classical C2000 Series C-Bus® Wall Switches**

- **C5031NL**
  Wall switch, 1 button

- **C5032NL**
  Wall switch, 2 button

- **C5034NL**
  Wall switch, 4 button

---

- May be programmed as dimmers, timers and on/off toggle switches
- 1, 2 or 4 buttons per wall switch
- Each unit features a programmable status indicator
- Available in a wide range of colours
- Units draw 18mA from a C-Bus® network
- C-Bus® Learn Enabled
C-Bus® Input Units
Wall Switches

Slimline™ SC2000 Series C-Bus® Wall Switches

- SC5031NL Wall switch 1 button, orange LED
- SC5032NL Wall switch 2 button, orange LED
- SC5034NL Wall switch 4 button, orange LED
- SC5031NLB Wall switch 1 button, blue LED
- SC5032NLB Wall switch 2 button, blue LED
- SC5034NLB Wall switch 4 button, blue LED

- May be programmed as dimmers, timers and on/off toggle switches
- 1, 2 or 4 buttons per wall switch
- Each button features a programmable LED status indicator
- Available in a wide range of colours
- Units draw 18mA from a C-Bus® network
- C-Bus® Learn Enabled.

Eclipse® SL2000 Series C-Bus® Wall Switches

- SL5031NL Wall switch 1 button, orange LED
- SL5032NL Wall switch 2 button, orange LED
- SL5034NL Wall switch 4 button, orange LED
- SL5031NLB Wall switch 1 button, blue LED
- SL5032NLB Wall switch 2 button, blue LED
- SL5034NLB Wall switch 4 button, blue LED

- May be programmed as dimmers, timers and on/off toggle switches
- 1, 2 or 4 buttons per wall switch
- Each button features a programmable LED status indicator
- Available in a wide range of colours
- Units draw 18mA from a C-Bus® network
- C-Bus® Learn Enabled.

C-Bus® Input Units
Wall Switches

Metal Plate and Multi-Gang C-Bus® Wall Switches

- May be programmed as dimmers, timers and on/off toggle switches
- Each button features a programmable LED status indicator
- Available in stainless steel and brass finishes
- The button dollies are available in White, Black or Brown
- The B style metal plate range is available in up to 132 gang configuration
- Wall boxes are supplied when ordering 8 gang or higher configurations
- Contact Clipsal when ordering above 24 gang
- Each 4 gang unit array draws 18mA from a C-Bus® network
- C-Bus® Learn Enabled.

‘A’ Style Deep Curved Plate
- stainless steel

- A5031NL Wall switch 1 button
- A5032NL Wall switch 2 button
- A5034NL Wall switch 4 button

‘B’ Style Flat Plate
- stainless steel

- B5031NL Wall switch 1 button
- B5032NL Wall switch 2 button
- B5034NL Wall switch 4 button
‘A’ Style Deep Curved Plate
- brass
BA5031NL Wall switch 1 button
BA5032NL Wall switch 2 button
BA5034NL Wall switch 4 button

‘B’ Style Flat Plate
- brass
BB5031NL Wall switch 1 button
BB5032NL Wall switch 2 button
BB5034NL Wall switch 4 button

‘B’ Style Stainless Steel Flat Plate
5008S164/3L Wall switch 8 button
5012S164/4L Wall switch 12 button
5016S164/6L Wall switch 16 button - horizontal
5016S162/3L Wall switch 16 button - vertical
5020S164/7L Wall switch 20 button
5024S164/8L Wall switch 24 button - horizontal

‘B’ Style Brass Flat Plate
5008B164/3L Wall switch 8 button
5012B164/4L Wall switch 12 button
5020B164/7L Wall switch 20 button
5024B164/8L Wall switch 24 button - horizontal
C-Bus® 30M Wall Switches

- Mounts into any Clipsal grid plate with a 30M aperture (ordered separately)
- Available in master and slave mechanisms
- Master mechanism can accommodate up to 3 slaves
- Master available in IR or non-IR variants
- Programmable as on, off, toggle, dimmer, timer, scene control and custom functions
- Selectable blue and orange LED indicator configured through C-Bus Toolkit software
- LED button indicator provides illumination and status feedback
- Nightlight feature
- Fall back level option to dim indicator at a set time after the last button press
- Programmed via Learn Mode or the C-Bus® Toolkit software
- Draws 18mA from the C-Bus® network
- Labelling option for each button
- Available in white only
- C-Bus® Learn Enabled

C-Bus® - 30M series

5031NMMIRL
30M Wall Switch
Master + IR, White

5031NMML
30M Wall Switch
Master, White

5031NMS
30M Wall Switch
Slave, White
General Analogue/Digital Input Unit

**5504GI**
General input unit, 4 channel

- Four channel general input unit, DIN rail mounted
- 8M DIN Modules Wide
- Dimensions 144mm x 85mm x 65mm
- Used to interface a C-Bus® system to third party products such as light level sensors, current sensors, temperature sensors, CO₂ detectors, differential sensors, pressure sensors, flow rate sensors, moisture probes etc
- Designed to either trigger the state of a C-Bus® group address as a function of input level or broadcast a message on the C-Bus® network, representing the input level
- Maximum of 10 units on a single C-Bus® network
- Can be used to measure analogue values (0-1V, 0-5V, 0-10V, 0-20mA, 4-20mA, 500 Ohm, 1k Ohm, 3k Ohm and 10k Ohm thermistor inputs)
- Requires a 24V d.c. connection (power pack included)
- Units draw 18mA from a C-Bus® network.

Bus Coupler Input Units

**5104BCL**
Bus coupler input unit, 4 channel

**5102BCLEDL**
Bus coupler input unit, 2 channel, with remote LED facility

- 5104BCL used to interface up to 4 standard voltage free mechanical switches, including latching and toggle switches to C-Bus®
- 5104BCL supports onboard scenes
- 5102BCLEDL used to interface up to 2 standard voltage free mechanical switches, including latching and toggle switches to C-Bus®, incorporates remote LED facility
- Dimensions 55mm x 49mm x 18mm
- The unit is designed to fit into a standard wall box
- Each unit features a programmable status indicator
- The maximum distance between the unit and an external voltage free switch is limited to 1 metre (use L5504AUX if longer distance required)
- Units draw 18mA from a C-Bus® network
- C-Bus® Learn Enabled.
DIN Rail Mounted
Auxiliary Input Unit

L5504AUX
Auxiliary input module, 4 channel

- Four channel auxiliary input module, DIN rail mounted
- 4M DIN Modules Wide
- Dimensions 72mm x 85mm x 65mm
- Permits voltage free switches to be connected to C-Bus®, such as Clipsal 30 Series mechanisms, limit switches and weatherproof switches
- Each unit features a programmable status indicator
- The unit may be programmed in the same way as a wall switch, to achieve the same functions such as timer, dimmer or toggle switches
- Draws 18mA from a C-Bus® network
- C-Bus® Learn Enabled

Temperature Sensor

5031RDTSL,WE
Temperature sensor, 0 - 50 degrees centigrade

- Used to measure and regulate either heating or cooling in the range 0 - 50 degrees centigrade
- Digital sensor (doesn’t require calibration in the field)
- Programmable target temperature and margin on installation
- Programmable set back temperature for when room is unoccupied
- Broadcast of temperature over C-Bus® network
- Adjustable temperature broadcast interval
- Temperature offset capabilities
- Provides additional zone sensors for the C-Bus® 4 zone Thermostat
- Units draw 18mA from a C-Bus® network
Light Level Sensor

- Used to measure and regulate lighting in the range of 40 – 1600lux
- Programmable target light level as well as the margin on installation
- Each unit features a programmable status indicator
- Can be used to achieve bank switching or continuous dimming
- Available in outdoor weatherproof 56 series enclosure
- Units draw 18mA from a C-Bus® network

5031PE, WE
Light level sensor, 40 - 1600lux

5031PEWP, GY
Light level sensor, 40 - 1600lux, weatherproof
Single Zone Thermostat

5070THBR
C-Bus® thermostat, programmable, single zone with 5 relays (relays for HVAC plant control only, not accessible via C-Bus®)

• Single zone C-Bus® thermostat
• Wall Mounted
• Dimensions 92mm x 127mm x 24mm
• Support for control of HVAC units via C-Bus® or the internal HVAC relays ('RWG' control)
• Manually adjustable temperature set point and mode of operation (heating, cooling or ventilation)
• The unit includes fan speed control and a ‘Setback’ or ‘Economy’ Mode
• Easy to use operator interface includes an integral LCD to display the current temperature and mode of operation
• Draws 40mA from a C-Bus® network.

5070THB
C-Bus® thermostat, programmable, single zone, no on board HVAC plant control relays

• Four zone (plus the common zone) programmable C-Bus® thermostat
• Wall mounted
• Dimensions 105mm x 149mm x 24mm
• Support for control of HVAC units via C-Bus® or directly using on board HVAC relays (RWG control)
• Manually adjustable temperature set point, mode of operation (heating, cooling or ventilation) and time schedules
• On board 7 day HVAC time scheduling (user programmable), manual fan speed control, and setback mode
• Easy to use interface, comprising of an LCD, manual control buttons and a rotating dial with an integral press switch
• Draws 40mA from a C-Bus® network.

4 Zone Thermostat with programmable time scheduling

5070THPR
C-Bus® thermostat, programmable, 4 zone, with 5 Relays (relays for HVAC plant control only, not accessible via C-Bus®)

5070THP
C-Bus® thermostat, programmable, 4 zone, no on board HVAC plant control relays
Passive Infrared Motion Detector - Outdoor

5750WPL
Occupancy sensor, infrared, IP66, outdoor

- PIR motion sensor suitable for outdoor use
- The unit has a field of view of 110° and a detection range which extends 18 metres
- The unit features a light threshold adjustment on the unit
- The time delay is programmable in the range 1 second to 18 hours
- Features a sunset switch program
- Draws 18mA from a C-Bus® network

Passive Infrared Motion Detector - Indoor

5751L
Occupancy sensor, infrared, indoor, corner mount

- PIR motion sensor suitable for indoor use
- The unit has a coverage range of 6m x 6m and a field of view of 90°
- The unit features a light threshold adjustment on the unit
- The time delay is programmable in the range 1 second to 18 hours
- Features a sunset switch program
- Draws 18mA from a C-Bus® network
Passive Infrared Motion Detectors - 360°

5753L
Occupancy sensor, infra-red, indoor, flush mount, 360°

- 360°, flush, ceiling mount PIR motion sensor
- Suitable for indoor use
- The unit has a coverage range of 6m x 6m and a field of view of 360°
- The unit features a light threshold adjustment on the unit
- The time delay is programmable in the range 1 second to 18 hours
- Features a Sunset Switch program
- Draws 18mA from a C-Bus® network

Multisensor

5753PEIRL
Multisensor, combined occupancy sensor, light level sensor and IR receiver

- Flush mount design with 360° detection pattern
- Capable of controlling up to 8 C-Bus® Scenes or 8 C-Bus® Group Addresses
- Supports the ‘Corridor Linking’ feature for commercial building applications
- Three LEDs indicate a range of actions from movement, to the receiving of IR commands and the device’s status
- Light and PIR sensitivity are set via adjustment screws located on the sensor unit
- Dual element detectors minimise false triggering
- Refer to 5753PEIRL Installation Instruction for location and mounting details
- An LED status indicator on the unit is used to report the current state of the load controlling device
- Draws 18mA from a C-Bus® network
- C-Bus® Learn Enabled
Infra-red Receivers

• Wall mounted IR receiver incorporating 4 stations of IR receivers
• Available with or without C-Bus® buttons
• May be programmed to achieve functions such as a dimmer, timer or toggle switch
• Units draw 18mA from a C-Bus® network
• C-Bus® Learn Enabled.

2000 Series

5031NIRL
4 channel infra-red receiver, rectangle

5034NIRL
4 channel infra-red receiver with 4 keys

Classic C2000 Series

C5031NIRL
4 channel infra-red receiver

C5034NIRL
4 channel infra-red receiver with 4 buttons

Slimline™ SC2000 Series

SC5031NIRL
4 channel infra-red receiver

SC5034NIRL
4 channel infra-red receiver with 4 buttons
C-Bus® Input Units
General Input Units

Eclipse® SL2000 Series

SL5031NIRL
4 channel infra-red receiver

SL5034NIRL
4 channel infra-red receiver with 4 buttons
C-Bus® Hand-held Infra-red Transmitters

- Works in conjunction with the infra-red receivers on page 25
- 4 channel and 12 channel units available
- The 4 channel device controls bank A of the receivers
- The 12 channel device controls banks A, B and C of the infra-red receivers
- Range up to 15 metres (line of sight).

5034TX
4 button hand-held infra-red transmitter

5034TX12
12 button hand-held infra-red transmitter

Universal Infra-red Remote Control Unit

- Universal, hand held, infrared remote control unit for control of electronic devices equipped with an infrared (IR) remote
- Control of up to 16 devices including C-Bus®, DVDs, TVs, satellite receivers, VCRs and CDs
- Large touch screen display
- Blue LED backlighting
- LED indicators provide information and feedback on:
  - Status of the beep feature (audible button press confirmation)
  - ‘Battery low’ warning
  - Confirmation of a successfully transmitted infrared code
  - Error warning
  - Touch screen page number.
- User programmable buttons for each device include 7 rubber buttons and 48 touch screen buttons
- Quick Control buttons
- Sleep button
- Page / date button
- Pre-programmed manufacturer codes for many models
- Incorporates imbedded C-Bus® IR codes for the C-Bus® 5038TX and 5035TX IR remote controls
- Easy to configure with new IR codes using the “learning eye”
- Macro function (up to 60 commands per macro)
- Learning IR codes from existing remote controls.

5030URC
Universal Infra-red Remote Control Unit, with LCD touch screen
C-Bus® Hand-held Infra-red Transmitters

- Designed for use with C-Bus® 30M Wall Switches, C-Bus® Neo Wall Switches, C-Bus® Multisensor and the 503xNIRL series wall switches
- 4 and 8 button version available
- Range of up to 15 metres (line of sight)
- Features IR Bank selection switch with each group of four buttons assigned to either bank A/B bank C/D.
- The bank selection is changed by removing the back cover.

5084TX
4 button C-Bus® Infared Remote Control with holder
C-Bus® Input Units

5088TX
8 button C-Bus® Infared Remote Control with holder

5080TXC
C-Bus® Remote Control Holder (spare)
C-Touch 6.4 Inch Colour Touch Screens

- Available in Neo®, flat stainless steel and Saturn™ Glass style surrounds
- 6.4” (diagonal), VGA, 640 x 480 pixels, colour LCD screen
- Displays pages of graphical items, such as buttons, sliders and images that perform C-Bus® related functions when pressed
- Includes a real time clock for automatic scheduling of events based on the time of day, week, month or year
- Controllable via an Infra-red hand held remote control unit
- Fully customised to suit user requirements via the included Windows™ compatible configuration software
- The software includes a logic engine module that allows the installer to program logic based (if-then-else) control into the touch screen configuration
- Connects directly to a C-Bus® network (no external C-Bus® PC Interface required)
- Control and monitor devices connected to C-Bus®, ethernet and RS-232 (custom ethernet and RS-232 support via the included logic programming language)
- Unit programmable via an ethernet connection
- Client / server plugin for Windows™ Media Player
- Animated buttons with more than 256 animation frames supported
- Fully customisable graphics including bar graphs, sliders, percentage indicators, images, gauges and clocks with any border and background style
- Supports web page embedding
- Supports IP camera inputs
- Supports project theme templates
- Audio WAV file support
- Scene control
- Event Scheduling support
- Irrigation control
- Password access control
- Dimensions: 246mm x 173mm x 72.5mm (excluding fascia).

C-Touch 6.4 Inch Colour Touch Screen - Saturn™ Series

5080CTC2-PW
Colour touch screen, 6.4 inch colour, pure white glass facia, less wall box, less power supply

5080CTC2.GF
Colour touch screen, 6.4 inch colour, white glass facia, less wall box, less power supply

5080CTC2-6
Colour touch screen, 6.4 inch colour, black glass facia, less wall box, less power supply

5080CTC2-3
Colour touch screen, 6.4 inch colour, cream glass facia, less wall box, less power supply

5080CTC2-7
Colour touch screen, 6.4 inch colour, mid-brown glass facia, less wall box, less power supply
C-Bus® Input Units

C-Touch 6.4 Inch Colour Touch Screen - Neo® Series

5050CTC2,GB
Colour touch screen, 6.4 inch colour, neo battleship grey facia, less wall box, less power supply

5050CTC2,WE
Colour touch screen, 6.4 inch colour, neo white facia, less wall box, less power supply

Colour Touch Screen - Metal Plate Series

BS5000CTC2
‘B’ style metal plate colour touch screen, 6.4 inch colour, stainless steel style facia, less wall box, less power supply

C-Touch 6.4 Inch Colour Touch Screen - Accessories

5000CTCWB
Wall box for 6.4 inch colour touch screen

5000CTCNA
Nail bracket for 6.4 inch colour touch screen

5000CTCRM
Gyproc™ bracket for 6.4 inch colour touch screen

5000CTCPS/2
Power supply for 6.4 inch colour touch screen, V2

5035TX2
Remote control to suit C-Bus® Touch Screen (spare).
C-Touch Spectrum Colour Touch Screens

- Wall mount or desk mount, touch sensitive colour LCD touch screen
- Displays 'pages' of graphical items, such as buttons, sliders and images that can perform C-Bus® related functions when pressed
- 320 x 240 pixel 65k colour LCD resolution
- Adjustable LED backlighting with ambient light compensation
- Powered from C-Bus®
- Proximity sensing for wake-up and control functions
- Anti-fingerprint screen
- Available with or without C-Bus® Logic Engine features
- Programmed via a standard USB port (easily accessible)
- USB port can be used as a PC interface to a C-Bus® System
- Separate RS-232 port is included for third party device integration (C-Bus® Logic Engine model only)
- Compatible with Version 4 of Clipsal's Windows® based drag and drop programming software (PICED)
- Real time clock included for automatic scheduling of events
- Allows control from infra-red hand held remote control
- Wide range of fascia colours and styles available (Saturn, Neo, Metal and Plastic versions)
- Dimensions 195mm x 136mm x 41.7mm (Saturn model)
- Units draw 75mA and are powered from C-Bus® (separate power supply not required)
- Wall box ordered separately

C-Touch Spectrum Colour Touch Screens

Saturn series - Wall Mount

C-5080CT2 and C-5080CTL2
Colour Touch Screen, Saturn glass fascia. Available in pure white (-PW), white (-GF), black (-6), cream (-3) and mid-brown (-7) and also with and without C-Bus® Logic Engine

Neo series - Wall Mount

C-5050CT2 and C-5050CTL2
Available in grey/brushed aluminium (-GB), white (-WE), black (-BK) and white/brushed aluminium (-28) and also with and without C-Bus® Logic Engine

Metal series - Wall Mount

C-Bx5000CT2 and C-Bx5000CTL2
Available in stainless steel (BS) and brass (BB) and also with and without C-Bus® Logic Engine

Plastic series - Wall Mount

C-SC5000CT2 and C-SC5000CTL2
Available in white (-WE), black (-BK) and cream (-CM) and also with and without C-Bus® Logic Engine
B&W MkII Touch Screens

- Wall mount or desk mount, touch sensitive black and white LCD touch screen
- Displays ‘pages’ of graphical items, such as buttons, sliders and images that can perform C-Bus® related functions when pressed
- LCD resolution of QVGA (320 pixels x 240 pixels)
- Adjustable LCD screen backlighting with ambient light compensation
- LCD uses white on black technology to enhance clarity
- Available with or without C-Bus® Logic Engine features.
- Programmed via a standard USB port (easily accessible)
- USB port can be used as a PC interface to a C-Bus® System
- Separate RS-232 port is included for third party device integration (C-Bus® Logic Engine model only)
- Compatible with Version 4 of Clipsal's Windows® based drag and drop programming software (PICED)
- Real time clock included for automatic scheduling of events
- Allows control from infra-red hand held remote control
- Wide range of fascia colours and styles available (Saturn, Neo, Metal and Plastic versions)
- Dimensions 195mm x 136mm x 41.7mm (Saturn model)
- Units draw 65mA and are powered from C-Bus® (separate power supply not required).
- Wall box ordered separately

B&W MkII Touch Screens
Saturn series - Wall Mount

5080CT2 and 5080CTL2
B&W MkII Touch Screen, Saturn glass fascia. Available in pure white (-PW), white (-GF), black (-6), cream (-3) and mid-brown (-7) and also with and without C-Bus® Logic Engine

Neo series - Wall Mount

5050CT2 and 5050CTL2
Available in grey/brushed aluminium (-GB), white (-WE), black (-BK) and white/brushed aluminium (-28) and also with and without C-Bus® Logic Engine

Metal series - Wall Mount

Bx5000CT2 and Bx5000CTL2
Available in stainless steel (BS) and brass (BB) and also with and without C-Bus® Logic Engine

Plastic series - Wall Mount

SC5000CT2 and SC5000CTL2
Available in white (-WE), black (-BK) and cream (-CM) and also with and without C-Bus® Logic Engine
C-Bus® Input Units

Architectural High Powered Dimmers

- Modular design with individual dimmer channel cards
- Soft start load turn-on protects lamp filaments
- Voltage compensation to minimise load brightness variation if the a.c. supply voltage drifts
- Filtering reduces supply voltage signalling effects
- Linear output load power following input control
- Universal dimming technology auto detects load type
- C-Bus® network burden and system clock generator
- After mains fail, dimmers return to previous or preset values
- Local C-Bus® override switches on front panel
- Channel Status indicators on front control panel
- On-board MCB protection
- Mounting brackets included for ease of installation
- Generous load and mains supply terminals
- Emergency lighting output for each channel
- Manual dimmer bypass switch on all channels
- Fan-free operation, reduces maintenance requirements
- Suitable for single or three phase track lighting applications with optional three phase MCBs
- Support for 128 on board lighting scenes
- Full integration with DMX512
- Selectable pre defined dimming curves
- Three prioritised auxiliary inputs
- Standby generator input
- Cross fading scene functions
- Optional Relay / DSI / DALI / 0-10V d.c. ballast card
- Complies with Australian (AS/NZS CISPR 15:2002) and International standards for light dimmers.

High Power, Multi Channel Dimmers

- Rugged, high quality dimmer unit specifically designed for theatrical dimming applications
- Dimensions 533mm x 486mm x 163mm
- Leading edge dimmers suitable for incandescent and low voltage lighting
- Feature opto-controlled electronic switching devices
- Chokes provide high rise time along with excellent high frequency noise suppression and low acoustic noise
- Feature “Advanced Phase Control” (APC) switching technique giving greater efficiency resulting in cooler operation and ultimately improved reliability
- Front panel buttons, channel switches, LED indicators and seven-segment display enable the user to monitor and select the built-in functions
- Control from either a DMX-512 source or from C-Bus®
- Units draw 22mA from a C-Bus® Network
- C-Bus® Learn Enabled.

L5112D10B2S

DIN Rail Mounted Universal Dimmer Range

L5504D2U
4 channel C-Bus® universal dimmer 250V a.c, 2.5A per channel, inbuilt 200mA C-Bus® power supply

L5504D2UP
4 Channel C-Bus® universal dimmer 250V a.c, 2.5A per channel, no inbuilt C-Bus® power supply

- 4 channel universal dimmer, DIN rail mounted
- 12M DIN modules wide
- Dimensions 215mm x 85mm x 65mm
- Features 4 channels of 2.5A rating
- Suitable for use with leading edge or trailing edge compatible low voltage transformers
- Suitable for low voltage electronic transformers, incandescent lamps and low voltage lamps with iron core transformers
- Features automatic load sensing
- Features a software selectable network burden and C-Bus® system clock
- A maximum of 10 units may be connected to a C-Bus® network
- Features an inbuilt 200mA C-Bus® power supply
- C-Bus® Learn Enabled.
DIN Rail Mounted Dimmer Range

L5508D1A
8 channel dimmer 250V a.c, 1A per channel, inbuilt 200mA C-Bus® power supply
- 8 channel dimmer, DIN rail mounted
- 12M DIN Modules Wide
- Dimensions 215mm x 85mm x 65mm
- Features 8 channels of 1A output, suitable for incandescent and low voltage lighting
- Features a software selectable network burden and C-Bus® system clock
- A maximum of 10 units may be connected to any C-Bus® network
- Features an inbuilt 200mA C-Bus® power supply
- C-Bus® Learn Enabled.

L550D1AP
8 channel dimmer 250V a.c, 1A per channel, no inbuilt C-Bus® power supply
- 8 channel dimmer, DIN rail mounted
- 12M DIN modules wide
- Dimensions 215mm x 85mm x 65mm
- Features 8 channels of 1A output, suitable for incandescent and low voltage lighting
- Features a software selectable network burden and C-Bus® system clock
- A maximum of 100 units may be connected to any C-Bus® network
- Does not source current to the network
- Draws 18mA from the C-Bus® when mains is not connected
- C-Bus® Learn Enabled.

L5504D2A
4 channel dimmer 250V a.c, 2A per channel, inbuilt 200mA C-Bus® power supply
- 4 channel dimmer, DIN rail mounted
- 12M DIN modules wide
- Dimensions 215mm x 85mm x 65mm
- Features 4 channels of 2A output, suitable for incandescent and low voltage lighting
- Features a software selectable network burden and C-Bus® system clock
- A maximum of 10 units may be connected to any C-Bus® network
- Features a 200mA C-Bus® power supply
- C-Bus® Learn Enabled.

L5504D2AP
4 channel dimmer 250V a.c, 2A per channel, no inbuilt C-Bus® power supply
- 4 channel dimmer, DIN rail mounted
- 12M DIN modules wide
- Dimensions 215mm x 85mm x 65mm
- Features 4 channels of 2A output, suitable for incandescent and low voltage lighting
- Features a software selectable network burden and C-Bus® system clock
- A maximum of 100 units may be connected to any C-Bus® network
- Does not source current to the network
- Draws 18mA from the C-Bus® when mains is not connected
- C-Bus® Learn Enabled.
C-Bus® Output Units

Dimmer Units

C-Bus® DSI Gateway Range

L5508DSI
8 channel dimmer for DSI electronic ballasts 250V a.c, inbuilt 200mA C-Bus® power supply

- 8 channel dimmer for DSI ballasts, DIN rail mounted
- 12M DIN modules wide
- Dimensions 215mm x 85mm x 65mm
- Provides C-Bus® control of electronic DSI digital ballasts
- The module controls up to 100 DSI ballasts per channel
- Up to 10 units may be connected to any C-Bus® network
- Used in conjunction with electronic DSI ballasts
- The Dimmer features a 200mA C-Bus® power supply
- C-Bus® Learn Enabled.

L5508DSIP
8 channel dimmer for DSI electronic ballasts 250V a.c, no inbuilt C-Bus® power supply

- 8 channel dimmer for DSI ballasts, DIN rail mounted
- 12M DIN modules wide
- Dimensions 215mm x 85mm x 65mm
- Provides C-Bus® control of electronic DSI digital ballasts
- The module controls up to 100 DSI ballasts per channel
- Up to 100 units may be connected to any C-Bus® network
- Used in conjunction with electronic DSI ballasts
- The Dimmer features a 200mA C-Bus® power supply
- C-Bus® Learn Enabled.

0-10V Analogue Output Unit

L5504AMP
4 channel analogue output, 0-10V

- Analogue output module, DIN rail mounted
- 4M DIN modules wide
- Requires a 240V a.c. connection
- Dimensions 72mm x 85mm x 65mm
- Can either source or sink current and is used to drive most types of 0-10V electronic dimmable ballasts
- The unit provides 4 independent output channels
- Powered from C-Bus® and requires 18mA at 15 - 36Vdc for correct operation
- The polarity of the signal may be selected so that 0V corresponds to maximum or minimum brightness
- Units draw 18mA from the C-Bus® when mains is not connected
- C-Bus® Learn Enabled.
Infra-red Output Units

- Transmits IR codes to third party devices
- Capable of broadcasting IR messages through two IR output channels (consist of 3.5mm mini audio mono sockets)
- Single or dual head emitter leads (ordered separately) should be connected to the output jacks. Catalogue numbers 8050LD and 8050LD/2
- Programmed via the High Speed Programming Cable (catalogue number 5100HSCU, ordered separately, see page 56)
- The installer has the facility to modify the stored codes using Windows™ based application software
- Stores a library of commonly used IR codes
- The Infrared Controller is based on the standard range of C-Bus® 4-button wall switches
- The standard colour is White Electric
- Units draw 32mA from the C-Bus® network.

Infra-red Output Units
- accessories

**5100HSCU**
High speed programming cable for C-Bus® 2 channel infra-red transmitter unit.

**5100RP**
Infra-red code learning unit
Infra-red code learning unit, complete with Windows™ based software. Required for learning third party infra-red codes not included in the code library shipped with the infra-red transmitter unit software.
10A Relay Units

**L5512RVF**
12 channel relay 250V a.c, 10A inductive load per channel, inbuilt 200mA C-Bus® power supply

- 12 channel relay module, DIN rail mounted
- 12M DIN modules wide
- Dimensions 215mm x 85mm x 65mm
- Featuring 12 channels of voltage free relay switching
- Rated at 10A incandescent or 10A fluorescent load per channel
- Incorporates a software selectable network burden and C-Bus® system clock
- A maximum of 10 units may be connected to any C-Bus® network
- Incorporates an inbuilt 200mA C-Bus® power supply
- C-Bus® Learn Enabled.

**L5512RVFP**
12 channel relay 250V a.c, 10A inductive load per channel, no inbuilt C-Bus® power supply

- 12 channel relay module, DIN rail mounted
- 12M DIN modules wide
- Dimensions 215mm x 85mm x 65mm
- Featuring 12 channels of voltage free relay switching
- Rated at 10A incandescent or 10A fluorescent load per channel
- Incorporates a software selectable network burden and C-Bus® system clock
- A maximum of 100 units may be connected to any C-Bus® network
- These units draw 18mA from C-Bus® network when mains is not connected
- C-Bus® Learn Enabled.
C-Bus® Output Units

Relay Units

10A Relay Units

L5508RVF
8 channel relay 250V a.c, 10A inductive load per channel, inbuilt 200mA C-Bus® power supply

- 8 channel relay module, DIN rail mounted
- 12M DIN modules wide
- Dimensions 215mm x 85mm x 65mm
- Featuring 8 channels of voltage free relay switching
- Rated at 10A incandescent or 10A fluorescent load per channel
- Incorporates a software selectable network burden and C-Bus® system clock
- A maximum of 10 units may be connected to any C-Bus® network
- Incorporates an inbuilt 200mA C-Bus® power supply
- C-Bus® Learn Enabled.

L5508RVFP
8 channel relay 250V a.c, 10A inductive load per channel, no inbuilt C-Bus® power supply

- 8 channel relay module, DIN rail mounted
- 12M DIN modules wide
- Dimensions 215mm x 85mm x 65mm
- Featuring 8 channels of voltage free relay switching
- Rated at 10A incandescent or 10A fluorescent load per channel
- Incorporates a software selectable network burden and C-Bus® system clock
- A maximum of 100 units may be connected to any C-Bus® network
- These units draw 18mA from C-Bus® network when mains is not connected
- C-Bus® Learn Enabled.
10A Relay Units

L5504RVF
4 channel relay 250V a.c, 10A inductive load per channel, inbuilt 200mA C-Bus® power supply

• 4 channel relay module, DIN rail mounted
• 8M DIN modules wide
• Dimensions 144mm x 85mm x 65mm
• Featuring 4 channels of voltage free relay switching
• Rated at 10A incandescent or 10A fluorescent load per channel
• Incorporates a software selectable network burden and C-Bus® system clock
• A maximum of 10 units may be connected to any C-Bus® network
• Incorporates an inbuilt 200mA C-Bus® power supply
• C-Bus® Learn Enabled.

L5504RVFP
4 channel relay 250V a.c, 10A inductive load per channel, no inbuilt C-Bus® power supply

• 4 channel relay module, DIN rail mounted
• 8M DIN modules wide
• Dimensions 144mm x 85mm x 65mm
• Featuring 4 channels of voltage free relay switching
• Rated at 10A incandescent or 10A fluorescent load per channel
• Incorporates a software selectable network burden and C-Bus® system clock
• A maximum of 100 units may be connected to any C-Bus® network
• These units draw 18mA from C-Bus® when mains is not connected
• C-Bus® LearnEnabled.
C-Bus® Output Units

C-Bus® Output Units

Changeover Relay Units

L5504RVFCP
4 channel changeover relay, 250V a.c, no inbuilt C-Bus® power supply, learn enabled

- 4 channel changeover relay modules with interlock features, DIN rail mounted
- 8M DIN modules wide
- Dimensions 144mm x 85mm x 65mm
- Used for control of air conditioning systems (on/off, low, medium and high) and shutter or blind control (up/down)
- The unit can be simply wired to achieve electrical interlocking, for use where outputs are all mutually exclusive
- Relays rated at 10A resistive, 5A incandescent/inductive, 1A fluorescent
- Incorporates a software selectable network burden and C-Bus® system clock
- A maximum of 100 units may be connected to any C-Bus® network
- These units draw 18mA from C-Bus® when mains is not connected
- C-Bus® Learn Enabled.

Motorised Blinds/Curtains/Shutter Relay Unit

L5501RBCP
C-Bus® Motorised Blinds/Curtains/Shutter Relay, 250 V a.c, no C-Bus® Power Supply

- Single channel relay unit for the direct control of motorised blinds, curtains or shutters via C-Bus®
- DIN rail mounted, 2M wide
- Dimensions 36 x 93mm x 63mm
- Allows up/down and stop control
- A maximum of 80 units may be connected to a C-Bus® network
- Powered from C-Bus®, draws 18mA
- C-Bus® Learn Enabled
- Optional remote mounting enclosure available, catalogue number 5501RE.
20A Relay Units

L5504RVF20
4 channel relay, 250V a.c, 20A inductive load per channel, inbuilt 200mA C-Bus® power supply

- 4 channel 20A relay module, DIN rail mounted
- 12M DIN modules wide
- Dimensions 215mm x 85mm x 65mm
- 4 channels of voltage free relay switching
- Rated at 20A incandescent, 20A HID or 20A fluorescent load per channel
- Relays feature magnetic latching
- Built in mechanical level for manual changeover of relay state
- Incorporates a software selectable network burden and C-Bus® system clock
- A maximum of 10 units may be connected to any C-Bus® network
- Incorporates an inbuilt 200mA C-Bus® power supply
- C-Bus® Learn Enabled.

L5504RVF20P
4 channel relay, 250V a.c, 20A inductive load per channel, no inbuilt C-Bus® power supply

- 4 channel 20A relay module, DIN rail mounted
- 12M DIN modules wide
- Dimensions 215mm x 85mm x 65mm
- 4 channels of voltage free relay switching
- Rated at 20A incandescent, 20A HID or 20A fluorescent load per channel
- Relays feature magnetic latching
- Built in mechanical level for manual changeover of relay state
- Incorporates a software selectable network burden and C-Bus® system clock
- A maximum of 100 units may be connected to any C-Bus® network
- Units draw 18mA from the C-Bus® when mains is not connected
- C-Bus® Learn Enabled.
Ceiling Sweep Fan Control Relay Unit

- Single channel relay unit for the direct control of ceiling sweep fans
- Capacitor control (utilise capacitor supplied with fan)
- In-built capacitor bay
- High temperature rated
- DIN rail mounted, 3M wide
- Dimensions 53 x 93mm x 65mm
- Up to 3-speed control of fan
- Powered from C-Bus®, draws 18mA
- Optional remote mounting enclosure available, catalogue number 5501FRE.
Standard Relay Units

5101R
1 channel relay
250V a.c. 10A inductive load

- Single C-Bus® relay unit
- Dimensions 198mm x 42mm x 39mm
- 1 channel of 240V a.c. switching
- Suitable for incandescent, inductive and fluorescent switching up to a maximum load of 10A
- A maximum of 100 units may be connected to any C-Bus® network
- These relays do not draw any current from C-Bus® network when mains power is connected.

5101RC
1 channel relay 250V a.c. 10A inductive load, with cord set

- Single C-Bus® relay unit
- Dimensions 198mm x 42mm x 39mm
- Featuring 1 channel of 240V a.c. switching
- Units are pre-wired with terminated C-Bus® cable and terminated double insulated mains cable
- Suitable for incandescent, inductive and fluorescent switching up to a maximum load of 10A
- A maximum of 100 units may be connected to any C-Bus® network
- These relays do not draw any current from C-Bus® network when mains power is connected.

5102RVF
2 channel voltage free relay 250V a.c, 10A inductive per channel

- 2 channel C-Bus® relay unit
- Dimensions 198mm x 42mm x 39mm
- Featuring 2 channels of 240V ac switching
- Suitable for incandescent, inductive and fluorescent switching up to a maximum load of 10A per channel
- A maximum of 100 units may be connected to any C-Bus® network
- These relays do not draw any current from C-Bus® network when mains power is connected.
Extra Low Voltage Relay Unit

- 8 x single pole, double throw (change-over) relays
- Powered from C-Bus®, draws 32mA
- Contacts rated 2A (AC3) @ 30V a.c./d.c.
- Relays can operate in pairs
- Local override
- Temperature rated to 50°C
- IP5x rated enclosure
- Removable terminals.

L5108RELVP
8 channel safe extra low voltage relay 30V a.c./d.c.
2A per channel
Wiser Home Controller

- Router platform giving connectivity to C-Bus® from local network and internet
- 4 LAN ports (one reserved for C-Bus® Network Interface)
- Wireless G/B/N access point
- Web server providing control from any PC web tablet (web browser supporting flash required) or Windows™ Vista Media Center
- Common user interface across all control devices
- Scene and scheduling capabilities on board
- Full Logic Engine capabilities on board which can control devices such as lighting, Multi-room Audio, HVAC, blinds and irrigation
- Allows installers remote access to re-program Wiser & C-Bus® from outside the home/building
- Future integration with many IP based devices
- Integration to Windows™ Vista Media Center
- Display RSS news feeds
- Monitor email account
- Product includes busbar for ease of installation (bridges ethernet and power)
- Multiple installation options; flat or upright on desktop and also wall or enclosure mounting (using keyhole points)
- Package includes Wiser Controller, in-line C-Bus® Network Interface, busbar, power supply, joiner and stand
- Product contains USB flash drive with manuals, help file, etc.
Pascal Automation Controller

- Provides extended conditional and real-time event programming for C-Bus®
- Programs downloaded to the unit from a PC
- Connects directly to C-Bus®
- Powered from C-Bus®
- 4M DIN modules wide
- 2 x RS-232 ports for third party device control
- A scheduling tool allows time based events to be programmed into the unit
- A scene programming tool allows installers to quickly and easily program scenes into the unit
- A programming wizard provides a GUI based method for creating basic logic programs.
- More complex programs are produced by advanced users utilising the freeform text programming method
- Programming language based on the standard Pascal computer language, enhanced by Clipsal with specific commands related to C-Bus® control.
- The language supports commands such as:
  - Conditional logic (if then, and, or, not etc)
  - Flow Control (for, repeat, while)
  - Variables (integer, real, Boolean, character, string)
  - Control and monitor C-Bus® group addresses
  - Control and monitor C-Bus® scenes
  - C-Bus® tag names
  - Serial (RS-232) input/output.
C-Bus® BACnet Gateway

5000BACNET
C-Bus® BACnet Gateway

- C-Bus® BACnet Gateway is a hardware interface
- Allows exchange of information between C-Bus® and a Building Management System supporting the BACnet protocol
- One full C-Bus® lighting application supported
- BACnet values supported: analogue read, analogue write and binary read
- Supplied pre-configured
- Supplied with an enclosure, C-Bus® PC Interface and BACnet module power supply

C-Bus® DALI Gateway

5502DAL
C-Bus® DALI Gateway

- C-Bus® to DALI Gateway, DIN rail mounted
- 4M DIN modules wide
- Dimensions 72mm x 85mm x 65mm
- Supports DALI lamp and ballast failure information to be available on the C-Bus® network
- Capable of controlling up to two DALI networks
- The unit supports DALI group addresses, short addresses and scenes the DALI global (broadcast) address
- A remote switch input is included to turn all DALI output channels to the ON or OFF states, irrespective of the current state of the C-Bus®, including no C-Bus®
- Incorporates the C-Bus® clock signal and a network burden
- Up to 50 DALI Gateways can be connected to a single C-Bus network
- Units Draw 32mA from a C-Bus® network

C-Bus® DMX Gateway

5500DMX
C-Bus® DMX Gateway

- C-Bus® to DMX-512-A Gateway
- Map 12 C-Bus® group addresses and levels to multiple combinations of DMX slot addresses
- Powered from C-Bus®, draws 50mA
- DIN rail mounted, 4M wide
- Supplied with 300mm DMX cable.

5502DAL2PS
C-Bus® DALI Gateway plus two DALI power supplies

- C-Bus to DALI Gateway, DIN rail mounted
- 4M DIN modules wide
- Dimensions 72mm x 85mm x 65mm
- Supports DALI lamp and ballast failure information to be available on the C-Bus® network
- Capable of controlling up to two DALI networks
- The unit supports DALI group addresses, short addresses and scenes the DALI global (broadcast) address
- A remote switch input is included to turn all DALI output channels to the ON or OFF states, irrespective of the current state of the C-Bus®, including no C-Bus®
- Incorporates the C-Bus® clock signal and a network burden
- Up to 50 DALI Gateways can be connected to a single C-Bus network
- Units Draw 32mA from a C-Bus® network
- Supplied with two DIN DALI power supply modules
C-Bus® System Units and Accessories

C-Bus® PC Interface

5500PC
C-Bus® PC interface

- C-Bus® PC interface, DIN rail mounted
- 4M DIN modules wide
- Dimensions 72mm x 85mm x 65mm
- Features two connections to C-Bus® (2 x RJ45 sockets)
- Features three connections to RS232 (2 x RJ45 and 1 x DB9 sockets)
- Units Draw 32mA from a C-Bus® network

C-Bus® Network Bridge

5500PCU
C-Bus® USB PC interface

- C-Bus® PC interface, DIN rail mounted
- 4M DIN modules wide
- Dimensions 72mm x 85mm x 65mm
- Features two connections to C-Bus® (2 x RJ45 sockets)
- Features one connection to USB (1 x type B socket)
- Units Draw 32mA from a C-Bus® network

C-Bus® Power Supply

5500PS
C-Bus® power supply, 350mA

- C-Bus® power supply, DIN rail mounted
- 4M DIN modules wide
- Dimensions 72mm x 85mm x 65mm
- Supplies 350mA at 18-36V d.c. to the C-Bus® network
- Each power supply supports approximately 18 standard C-Bus units
- Up to 5 power supplies may be used on any single C-Bus® network

C-Bus® Network Bridge

5500NB
C-Bus® Network bridge

- C-Bus® network bridge, DIN rail mounted
- Based on a 4M DIN module
- Dimensions 72mm x 85mm x 65mm
- Provides a two-way C-Bus® to C-Bus® network interface
- Units draw 18mA from a C-Bus® network
C-Bus® Ethernet Network Interface

5500CN
C-Bus® Ethernet network interface

- C-Bus® Ethernet network interface, DIN rail mounted
- 4M DIN modules wide
- Dimensions 72mm x 85mm x 65mm
- Provides a two-way C-Bus® to Ethernet network interface
- Allows C-Bus® commands to be distributed via a 10 Base-T Ethernet (TCP/IP) network
- Features 2 x C-Bus® RJ45 connections and 1 x Ethernet RJ45 connection
- The unit requires an external 9-12V d.c. power pack supplied.

C-Bus® Ethernet Network Analyser

5100NA
C-Bus® network analyser

- The Network Analyser is a tool used to measure various C-Bus® system parameters:
  - Power Available
  - Clock Signal Present
  - Excess Voltage
  - Add/Remove Burden
  - Excess Cable Indication
- Dimensions 60.5mm x 120mm x 30.3mm
- Measures capacitance, burden, clock signal and network voltage
- The network analyser is powered from C-Bus® and is supplied with a pair of leads.

C-Bus® Network Monitor

5100CN2
C-Bus® inline Ethernet network interface

5500NMA
C-Bus® network monitor

- C-Bus® network monitor, DIN rail mounted
- Based on a 4M DIN module
- Dimensions 72mm x 85mm x 65mm
- Activates C-Bus® Remote ON override in the event of a C-Bus® network failure
- Passive device, does not transmit any data onto the network
- Units draw 18mA from a C-Bus® network.
C-Bus® System Units and Accessories

C-Bus® Cable

5005C305B
C-Bus® Category 5, 4 pair, UTP cable, 305 metres, solid conductors

5005C305BST
C-Bus® Category 5, 4 pair, UTP cable, 305 metres, stranded conductors

- 4 pair, Category 5, unshielded cable with a unique outer colour sheath specifically designed for the C-Bus® system
- A maximum of 1000 metres of cable is permitted on any one C-Bus® network
- Two pairs are used for the C-Bus® connection C-Bus® positive (blue + orange) and C-Bus® negative (blue/white + orange/white)
- The C-Bus® cable must be segregated from the mains cable in C-Bus® installations
- C-Bus® cable has a mains rated outer sheath and Standard Cat 5 cable does not have this rating
- Suitable for use inside electrical enclosures
- Available in both solid and stranded conductor variants

C-Bus® Barcode Reader

5100BCS
C-Bus® Bar code reader, USB connection, for use with C-Bus® Toolkit software

- Hand-held USB barcode reader
- Used in conjunction with C-Bus Toolkit software
- Provides a convenient and time saving method of inputting information about C-Bus units, as they are added to an installation
- Unit is configured to wake up when trigger button is depressed
- LED indicator and audible alert provide confirmation of a barcode read

Cat. 5e Shuttered Socket

30RJ45SMA5SH,PK
Pink modular Cat. 5e RJ45 shuttered socket

- Pink modular cat. 5e RJ45 shuttered socket
- Suits C-Bus® installations

C-Bus® Network Burden

5500BUR
C-Bus® network burden

- C-Bus® network RJ45 hardware burden
- Supplied in pack of 10
C-Bus® Toolkit Software

C-Bus® Toolkit software is a PC-accessible C-Bus® network configuration and customer solution programming utility. It allows the installer to:

- Connect directly to an installer C-Bus® network via a C-Bus® PC interface unit to synchronise logical and physical C-Bus® customer site data.
- Configure the C-Bus® network to define the C-Bus® architecture of the customer site and ensure C-Bus® units can communicate with each other.
- Program and commission the customer solution.
- Save, backup and restore sites. C-Bus® Toolkit has a database for creating and storing customer site programming as projects.

C-Bus® Software Installer Dongle

The C-Bus® Software Installer Dongle is a valuable installer tool for creating/commissioning projects using C-Bus® Version 4 Schedule Plus & HomeGate software and also C-Bus® Version 1 OPC Server. The dongle is time restricted and allows the software to operate in 'normal' mode for anywhere between 48 to 72 hours per use (the software then returns to evaluation/demo mode). The installer dongle is compatible with future software releases.

5000SDINST/1
Installer dongle for C-Bus® software, unlimited networks.

HomeGate Software

The HomeGate application software provides a powerful but simple to use interface to C-Bus® via a standard PC. HomeGate provides scheduling, manual control and monitoring of a domestic C-Bus® system from a PC running Windows 98, 2000, NT, ME or XP. HomeGate comprises of a project editor, real time monitoring and control, a real time scheduler, security and access control and internet access. It also includes help and support documentation.

A HomeGate USB dongle must be purchased to take the software from an evaluation version to a full working version.

5000SDHG2/4
2 network licence dongle for HomeGate V4

5000SDHG10/4
10 network licence dongle for HomeGate V4
Schedule Plus Software

Schedule Plus application software provides a powerful and easy use interface to C-Bus® via a standard PC. Schedule Plus has been developed specifically for commercial and industrial applications. It provides scheduling, manual control and monitoring of a C-Bus® system from a PC running Windows 98, 2000, NT, ME or XP. A Schedule Plus USB dongle must be purchased to take the software from an evaluation version to a full working version.

5000SDSP2/4
2 network licence dongle for Schedule Plus V4

5000SDSP10/4
10 network licence dongle for Schedule Plus V4

5000SDSPU/4
Unlimited network licence dongle for Schedule Plus V4

C-Bus® OPC Server Software

The C-Bus® OPC Server provides an interface between third party software (OPC Clients) and a C-Bus® System. The C-Bus® OPC Server acts as a gateway for transmitting C-Bus® lighting type application information between third party Building Management Systems (such as Honeywell, Johnson, TAC, etc.) or Process Control Presentation (SCADA) Systems and a Clipsal C-Bus® System.

A C-Bus® OPC Server USB dongle must be purchased to take the software from an evaluation version to a full working version.

Alternatively, the C-Bus® OPC Server is able to recognise licenses manufactured by CITECT (currently only product versions based on the CITECT SCADA Version 7 platform and later are supported).

5000SDOPC2/1
2 network licence dongle for C-Bus® OPC Server V1

5000SDOPC10/1
10 network License Dongle for C-Bus® OPC Server V1

5000SDOPCU/1
Unlimited network license for C-Bus® OPC Server V1
Piced Software

Programming Interface for C-Bus® embedded devices

Piced is used to configure the following devices to meet the user's requirements:

- C-Touch black and white MkII touchscreen
- Colour C-Touch touchscreen
- Pascal Automation Controller (PAC)
- Wiser Home Controller

The Piced software features include:

- Display of many components on many pages
- Scenes for the control of many loads together
- Schedules for the automatic control of loads
- Access control to provide security
- Irrigation control
- Widget Manager for Wiser project creation

Piced is freely downloadable from the Clipsal Integrated Systems web site.

Marpa Software

Multi Room Audio Rapid Programming Application

Marpa software is used to configure the C-Bus® Multi Room Audio Matrix Switcher unit and is freely available from the Clipsal Integrated Systems web site. It requires the use of USB port on the PC to connect to the Matrix Switcher. Marpa software requires that the C-Bus® Toolkit is installed.

Marpa is freely downloadable from the Clipsal Integrated Systems web site.
**Tica Software**

**Telephone Interface Commissioning Application**

Tica software is used to configure the C-Bus® Telephone Interface (CBTI). It requires the use of a RS232 serial port on the PC to connect to the CBTI. Tica software requires that C-Bus Toolkit is installed.

Tica software is freely downloadable from the Clipsal Integrated Systems web site.

---

**Circa Software**

**C-Bus® Infrared Commissioning Software**

Circa software is used to commission C-Bus® Infrared Devices (5034NIRT). The software allows the user to select IR codes and assign them to particular output channels on an Infrared Device and make associations between IR codes and C-Bus® events. This is achieved by using the USB programming cable (5100HSCU). The user can import IR device files created by the 5100RP Infrared Reader device. Circa software requires that C-Bus® Installation Software V2 is installed.

Circa software is freely downloadable from the Clipsal Integrated Systems web site.
The C-Bus® Multi-Room Audio System allows users to listen to and control audio sources from convenient locations around the home. The system is both simple to install and easy to use.

The system has been designed utilising new digital audio distribution technology (developed by Clipsal), in conjunction with Clipsal C-Bus® core technology for system communication and integration.

Clipsal's digital audio distribution technology allows for noise and interference free audio reproduction, whilst the C-Bus® technology allows the audio products to be seamlessly integrated and used with all existing C-Bus® products. For example, volume can be controlled from the same C-Bus® switch or touch screen controlling lighting.

In addition, the system allows any input audio source to be made available in any audio zone. Changes to the input audio source can easily be made by the user from a local C-Bus® device at any time, regardless of where the audio source equipment (e.g., CD Player) is physically located. It is compatible with most audio sources and it accommodates standard stereo line level analogue inputs as well as digital audio TOS link inputs.

Infrared signals from hand held remote controls can be routed through the system by connecting IR targets and emitters. IR commands can also be stored by the system and activated by programmed C-Bus® commands.

The C-Bus® Multi-Room Audio System allows a number of different system layout options. This flexibility allows for a wide range of customer needs and installation requirements. Two example schematics are shown opposite.

**Option A**

This basic option allows a single audio source to be available to a number of C-Bus® Audio Amplifiers and to be controlled from convenient locations around the home (via any combination of C-Bus® input devices). This option requires one Cat-5 cable for the audio distribution. This cable is cascaded between each Audio Amplifier.

**Option B**

This option allows more flexibility. Multiple audio sources are made available to all audio zones, with all the audio sources selectable on a zone-by-zone basis via C-Bus® Input Devices. This option requires a separate (star wired) Cat-5 audio cable to each Audio Amplifier in a zone.
## Audio Matrix Switcher

**560884/2E**
Deluxe Audio Matrix Switcher, C-Bus® enabled, four stereo audio input sources, streaming audio and 8 digital audio output sources.

**560884/2**
Standard Audio Matrix Switcher, C-Bus® enabled, four stereo audio input sources and 8 digital audio output sources.

- Digital audio distribution technology, for noise free audio reproduction
- Stream digital audio from a host PC running C-Bus® Ripple Software (deluxe model only)
- Four stereo analogue audio source inputs
- On-board dual AM/FM tuners
- Audio sources switched via any C-Bus® input device or via the control panel on the front of the Matrix switcher
- Eight digital audio zone outputs (~45m for each star wired output)
- Supports audio scenes (8 scenes containing 8 zones)
- Cat-5 cable connection between Matrix switcher and amplifiers
- Two mono annunciation inputs
- Voice annunciation of channel changes (selectable)
- One fibre-optic SPDIF input (digital audio compatible)
- One custom digital input to allow cascading of units or for connecting an Audio Distribution Unit giving 1 additional stereo analogue input
- C-Bus® infrared output (2 zones) for third party equipment control
- Reticulated IR support
- User interface consisting of LCD display and tactile feedback switches
- C-Bus® messages control selection of input/output routing
- Contains a C-Bus® PC interface
- C-Bus® supply voltage: 15-36Vd.c. @ 22mA (does not provide power for C-Bus® network)
- Configuration set up through USB
- Control via C-Bus® input devices, such as C-Bus® wall switches, touch screens, etc
- Field upgradable via USB port
- Dimensions: 436mm x 288mm x 80mm
- Designed to be installed in locations where audio/visual equipment is installed ie. A/V cabinet or rack.

## Audio Distribution Unit

**560011**
Audio Distribution Unit, one stereo audio input source and one digital output source

- Distributes a single stereo audio source to C-Bus® Audio Amplifiers via a digitised signal over Cat-5 cable.
- Does not require any C-Bus® programming
- One stereo analogue audio source input
- One digital audio output (cascadable to multiple zones)
- Output can be looped between C-Bus® Audio Amplifiers
- Dimensions: 165mm x 50mm x 40mm.

**5600P24/500AU**
External power supply for audio distribution unit, switch mode, 24V d.c, 500mA (only required if 560011 used to provide an additional digital input for Matrix Switcher)
Audio Amplifiers

560125D/2 & 560125R/2
25 Watt/channel (RMS) stereo audio amplifier, C-Bus® enabled, desktop-mount and remote-mount version

560110R
10 Watt/channel (RMS) stereo audio amplifier, C-Bus® enabled, remote-mount version

- Used in conjunction with the C-Bus® Audio Matrix Switcher or the Audio Distribution Unit
- Controllable via C-Bus® input devices, such as C-Bus® wall switches, touch screens and Wiser Home Controller
- Volume, bass, treble, balance controlled by C-Bus® input devices
- Quiet digital audio design
- Stereo 25W RMS per channel – Remote and desktop mounted units (when power supply fitted) or stereo 10W RMS per channel – Remote mounted unit
- Can be cascaded off one Digital Audio Cat 5 input
- Repeater function - digital audio pass through capability (default on)
- Pre-amp output stage for connecting to a 3rd party power amplifier (25W RMS per channel amplifiers only)
- Desktop Amplifier includes power on/off, mute, volume and source select buttons and an infrared target for remote control. Also includes 3.5mm stereo head phone jack
- Desktop Amplifier supports Dynamic Control via long presses of source select buttons on front panel
- Four 10W per channel amplifiers can be joined together for installation on a 19” equipment rack tray
- Signal source either:
  - Distributed digital
  - Locally connected line-level analogue
  - Fibre-optic (TOSlink) SPDIF (16bit, 48kHz)
- IR Target connection for reticulated IR support
- High efficiency, ~70% at full power
- Dimensions (desktop 25W RMS per channel): 181mm x 216mm x 75mm
- Dimensions (remote 25W RMS per channel): 175mm x 212mm x 71mm
- Dimensions (remote 10W RMS per channel): 120mm x 158mm x 40mm
- C-Bus® supply voltage: 15 - 36V d.c. @ 22mA.
Premium Audio Speakers

In-ceiling Speakers

- Concealed high quality audio reproduction perfect for home theatre, multi-room audio and outdoor audio applications
- Flush mount design ensures only the front face of the speaker is visible and is flush with the ceiling
- In-ceiling speakers come complete with black boxes to maximise and control bass response whilst keeping out dust
- Outdoor speakers are waterproof containing aluminium grilles and mounting brackets plus marine grade stainless steel hardware.

In-ceiling Speakers

5600K01-WE
Krix Holographix Speakers (pair), circular, in-ceiling, 3-inch full range

- Supplied as a pair
- Sensitivity: 86dB
- Frequency response: 65Hz – 20kHz
- Power Handling: Max. 60W RMS amplifier power
- Impedance: 6 ohms
- Dimensions: 240mm diameter x 140mm deep (205mm diameter cut-out)
- Colour: white.

5600K02-WE
Krix Hemispherix Speaker (single), circular, in-ceiling, 4-inch 2-way

- Supplied single
- Sensitivity: 86dB
- Frequency response: 65Hz – 20kHz
- Power Handling: Max. 60W RMS amplifier power
- Impedance: 6 ohms
- Dimensions: 240mm diameter x 140mm deep (205mm diameter cut-out)
- Colour: white.
Multi-room Audio

5600K03-WE
Krix Atmospherix Speaker (single), circular, in-ceiling, 5-inch 2-way

- Supplied single
- Sensitivity: 90dB
- Frequency response: 45Hz – 20KHz
- Power Handling: Max. 100W RMS amplifier power
- Impedance: 6 ohms
- Dimensions: 280mm diameter x 190mm deep (247mm diameter cut-out)
- Colour: white.

5600K06-WE, 5600K06-BK
Krix Aquatix Speakers (pair), outdoor, marine grade waterproof, 5-inch 2-way

- Supplied as a pair
- Sensitivity: 87dB
- Frequency Response: 70Hz – 20kHz
- Power Handling: Max. 80W RMS amplifier power
- Impedance: 8 ohms
- Colour: white and black.

5600K07-WE, 5600K07-BK
Krix Tropix Speakers (pair), outdoor, marine grade waterproof, 6.5-inch 2-way

- Supplied as a pair
- Sensitivity: 87dB
- Frequency Response: 55Hz – 20kHz
- Power Handling: Max. 100W RMS amplifier power
- Impedance: 8 ohms
- Colour: white and black.

Outdoor Speakers
Multi-Room Audio System

8050/2LD
IR Emitter Lead, dual

8050ST
IR Shelf Target, with 1.8m cable

8050TT
IR Tube Target, with 1.8m cable

8050FT
IR Flat Target, with 1.8m cable
C-Bus® Enabled Security Panel

- On-board, direct connection to C-Bus® (no C-bus PC Interface required)
- Supports the C-Bus® Security Application command set
- Alarm events such as Armed, Disarmed and Alarm can be used to initiate C-Bus® commands, e.g. turn C-Bus® controlled lighting on or off
- Ability to map up to 16 alarm events to 16 C-Bus® commands
- Ability to arm the security from C-Bus® input device (e.g. touch screen or wall switch)
- Provided complete with a wall mounted security keypad and rechargeable system backup battery
- Built-in telephone dialer
- Access control features with provision for up to three Wiegand card readers (Wiegand interface, readers and cards purchased separately)
- 16 fully programmable security zones
- 16 physical security zone inputs with zone split option
- Two additional 24 hour inputs
- Plug-in RF interface to support a range of Wireless detectors
- 4 programmable auxiliary outputs
- 56 user codes which can be assigned 3 to 6 digit PIN codes
- Two button arming feature
- Programmable two area partitioning with overlapping of zones in areas allowed
- Single or double trigger option on a zone-by-zone basis
- Supports up to 55 radio keys
- Secure DTMF remote arm / disarm capabilities
- Wide range of security and access control accessories are available, including:
  - Expansion modules
  - RF Expansion modules
  - Sirens and Strobes
  - Motion detectors
  - RF motion detectors
  - Reed switches
  - Keypads

5400/16CB
Alarm Panel, 16 Zones, C-Bus Enabled
The C-Bus® Wireless product range incorporates a family of C-Bus® Radio Frequency (RF) devices, including Wall Plates, Plug Adaptors, Remote Control and a Gateway to Cat-5 wired C-Bus® units.

C-Bus® Wireless Wall Switches are designed to easily replace standard, 240V wall switches. They incorporate patented Clipsal technology and are two wire devices requiring no neutral (240V a.c. active and load connections only).

All C-Bus® Wireless units incorporate Clipsal C-Bus® unique Learn Mode functions for programming devices. Wall switches, Plug Adaptors and the Gateway Unit can also be programmed via the C-Bus® Toolkit software. Multiple C-Bus® Wireless units can be linked into a common network using Learn Mode or the C-Bus® Toolkit software.

Associations can be created between buttons on multiple units, so that a button pressed on one unit will operate a button on another (and the connected lights or other electrical devices).

C-Bus® Wireless units include scene capabilities, which allow the user to perform a series of actions across multiple outputs by pressing a single button. For example, on arrival home a home owner could use a scene to switch on lights in the hallway, kitchen and lounge, and also switch on a heater.

The diagrams below show two of the many possible basic C-Bus® Wireless unit installations. Room A uses stand-alone units, which can be switched via the Wireless Remote Control. Room B uses networked units where buttons on one unit can operate other units or trigger scenes.
Basic Operation

Buttons on a Wireless Wall Switch or Plug Adaptor are organised in pairs that control the output channels (local control buttons). Remaining pairs (free buttons) are used to control outputs on other units when multiple C-Bus® Wireless units are configured as part of a network. For example, the figure to the right shows a 6 button, 2 channel Saturn™ Wireless Dimmer Wall Switch. Its buttons perform the following functions:

- Buttons 1 and 2 control the first channel. (A quick press on either button toggles the channel on or off. A long press on button 1 or 2 dims down or up respectively).
- Buttons 3 and 4 control the second channel.
- Buttons 5 and 6 are unused when the unit is used as a stand-alone unit. They may be used to control outputs on other units when part of a multi-unit network.

When a C-Bus® Wireless Wall Switch or Plug Adaptor unit is first installed, it functions as a stand-alone unit. In this basic default mode, the unit functions as a dimmer or switch, depending on the model.

C-Bus® Wireless Plug Adaptors have one output channel (a single, 240V a.c. socket) and two buttons. Wall Switch units are available in one or two output channel versions, with two, four, six or eight buttons (eight button, Neo® only). Each channel controls one or more lights or other electrical devices connected to its output.
C-Bus® Wireless Networks

To experience the full capabilities of wireless operation, C-Bus® Wireless units must be linked together to form a network.

To communicate with each other, units within the same network should be located within 15 to 20 metres of each other. This distance depends on building materials used.

Up to 30 units may be connected within the same C-Bus® Wireless network.

C-Bus® Wireless Network Security

C-Bus® Wireless units can optionally use 128 bit-encrypted messages to communicate with each other. This results in a highly secure network.

Nearby C-Bus® Wireless Networks

It is possible to have several separate networks present alongside each other without interfering, as each separate C-Bus® Wireless network has an automatically assigned, unique ‘House Code’.

C-Bus® Wireless Modes of Operation

C-Bus® Wireless units have five major modes of operation.

Mode 1
Stand-Alone Mode

In this mode, C-Bus® Wireless Wall Switches and Plug Adaptors acts as stand-alone dimmers or switches and make no use of the inbuilt wireless capabilities. No setup is required for this mode, Plug Adaptors simply plug into the mains, and Wireless Wall Switches are installed by a licensed electrician in place of existing wall switches. The buttons on the units control the local dimming or switching channels of the unit only.

Mode 2
Simple Remote Controlled Mode

In this mode, a C-Bus® Wireless Wall Switches acts as a stand-alone dimmer or switch and a C-Bus® Wireless Remote Control operates the Wall Switch from a distance. This mode is simple to set up and is suitable for small installations where networking is not needed. C-Bus® Wireless Wall Switch or Plug Adaptor units are controlled using a C-Bus® Wireless Remote: In this mode, the buttons on the Wireless Wall Plate control the local dimming or switching channels of the unit, and the Remote Control is linked to buttons on a Wall Switch using a Learn Mode operation. No PC is required.
Mode 3

Networked Mode
In this mode, a C-Bus® Wireless Wall Switch acts as a dimmer or switch and multiple C-Bus® Wireless units can be linked to each other with the C-Bus® Wireless technology. This mode is simple to setup, and is suitable for more complex installations. In this mode, local control buttons control the dimming or switch channel of the unit, and may also control other C-Bus® Wireless units. Free buttons can control the dimmer or switch channels of other units via a C-Bus® Wireless network established using Learn Mode operations. The operation of buttons is set using Learn Mode operations or using the C-Bus® Toolkit software.

Mode 4

Networked with Remote
In this mode, a C-Bus® Wireless Wall Switch acts as a dimmer or switch and multiple C-Bus® Wireless units can be linked to each other with the C-Bus® Wireless technology. Local control buttons control the dimming or switch channel of the unit, and may also control other C-Bus® Wireless units. Free buttons can control the dimmer or switch channels of other units via a C-Bus® Wireless network established using Learn Mode operations or C-Bus® Toolkit software. Buttons on the Wireless Remote are linked to Wall Switch and Plug Adaptor buttons as desired.

Mode 5

Networked mode in combination with Cat-5 wired C-Bus® units
The C-Bus® Wireless Gateway is used to link a C-Bus® Wireless network to a C-Bus® Cat-5 wired network. It is functionally equivalent to a C-Bus® Network Bridge. Using the Gateway, C-Bus® Wireless and Cat-5 networks can communicate and interact with each other. Both Wireless and Cat-5 Network's use the same command structure, and are 100% compatible.
C-Bus® Wireless Wall Switch Range

- Allow existing, 240V a.c. operated wall switches to be replaced with C-Bus® Wireless Wall Switches containing C-Bus® Wireless technology.
- Communicate with other C-Bus® Wireless devices using radio frequency wireless messaging and form a C-Bus® Wireless Network.
- Switch buttons enable control of the load/s directly connected to the wall switch and can also control loads connected to other C-Bus® Wireless devices.
- Each switch button can be programmed to function as an on/off switch, a dimmer, or can issue a scene, as well as a number of other options.
- Can be controlled via C-Bus® Cat-5 Wired Input Units (via a Gateway Unit), such as touch screens.
- Unique C-Bus® Wireless House Code.
- 128-encrypted communications.
- 2-Wire connection – active and load (no neutral required).
- Programmable via C-Bus® Learn features or via C-Bus® Toolkit software.
- Available in 1 channel and 2 channel versions.
- Leading Edge and Trailing Edge Dimming Units, 1 channel 500VA and 2 Channel 250VA per channel.
- Relay unit, 1 channel 8A (fluorescent) rating and 2 Channel 4A (fluorescent) per channel.
- Available in Neo® and Saturn™ and Modena style.

Wall Switches with Integral Relay Outputs

**Saturn™ Style**

- **5882R8F1AA**
  C-Bus® Wireless wall switch, 2 button, 1 channel relay, 8A (fluorescent) rating.

- **5884R8F1AA**
  C-Bus® Wireless wall switch, 4 button, 1 channel relay, 8A (fluorescent) rating.

- **5886R8F1AA**
  C-Bus® Wireless wall switch, 6 button, 1 channel relay, 8A (fluorescent) rating.

- **5884R4F2AA**
  C-Bus® Wireless wall switch, 4 button, 2 channel relay, 4A (fluorescent) per channel rating.

- **5886R4F2AA**
  C-Bus® Wireless wall switch, 6 button, 2 channel relay, 4A (fluorescent) per channel rating.

Available in white, black, cream and mid-brown.
Wall Switches with Integral Relay Outputs

Modena Style

- **LHC2R8F1**
  - C-Bus® Wireless wall switch, 2 button, 1 channel relay, 8A (fluorescent) rating

- **LHC4R8F1**
  - C-Bus® Wireless wall switch, 4 button, 1 channel relay, 8A (fluorescent) rating

- **LHC6R8F1**
  - C-Bus® Wireless wall switch, 6 button, 1 channel relay, 8A (fluorescent) rating

- **LHC4R4F2**
  - C-Bus® Wireless wall switch, 4 button, 2 channel relay, 4A (fluorescent) per channel rating

- **LHC6R4F2**
  - C-Bus® Wireless wall switch, 6 button, 2 channel relay, 4A (fluorescent) per channel rating

Available in white and black

Wall Switches with Integral Relay Outputs

Neo® Style

- **5852R8F1AA**
  - C-Bus® Wireless wall switch, 2 button, 1 channel relay, 8A (fluorescent) rating

- **5854R8F1AA**
  - C-Bus® Wireless wall switch, 4 button, 1 channel relay, 8A (fluorescent) rating

- **5858R8F1AA**
  - C-Bus® Wireless wall switch, 8 button, 1 channel relay, 8A (fluorescent) rating

- **5854R4F2AA**
  - C-Bus® Wireless wall switch, 4 button, 2 channel relay, 4A (fluorescent) per channel rating

- **5858R4F2AA**
  - C-Bus® Wireless wall switch, 8 button, 2 channel relay, 4A (fluorescent) per channel rating

Available in grey and silver, white electric, cream, desert sand, soft grey, black and brown

C-Bus® Wireless Plug Adaptors

- Allow devices normally plugged into 240V a.c. general purpose outlets (for example, lounge or bedside lamps or AV equipment) to be controlled using C-Bus® Wireless technology
- Communicate with other C-Bus® Wireless devices (such as Wireless Wall Switches) using radio frequency wireless messaging and form a C-Bus® Wireless Network
- C-Bus® Wireless Plug Adaptors plug into existing power outlets and the device to be controlled via C-Bus® Wireless then piggybacks into the Plug Adaptor. No additions or alterations to existing wiring are required
- Plug into a Standard Australian and New Zealand general purpose electrical outlet
- Available in Leading Edge Dimming and Trailing Edge Dimming Units, as well as a Relay output version
- Integral, easily accessible control/override/programming buttons
- Can be controlled via C-Bus® Cat-5 wired Input units (via a Gateway Unit), such as touch screens
- Unique C-Bus® Wireless House Code
- 128-encrypted communications
- Programmable via C-Bus® Learn features or via C-Bus® Toolkit software.

Relay

C-Bus® Wireless Remote Control Unit

5888TXBA
C-Bus® Wireless hand-held remote control unit with holder

5080TXC
C-Bus® Remote Control Holder (spare)

LHC8TXRF
C-Bus® Wireless hand-held remote control unit with holder

- Allows control of buttons on C-Bus® Wireless Wall Switch and Plug Adaptor units remotely
- Utilises radio frequency (RF) communication
- Does not need to be pointed directly at the unit being controlled
- Capable of controlling up to 10 separate Wall Switch or Plug Adaptor buttons
- A single button on a Wall Switch or Plug Adaptor can be controlled by up to two C-Bus® Wireless Remote Controls
- Buttons are organised in two banks of five buttons. Banks are alternately selected by pressing the ‘Shift’ button
- Up and Down buttons allow dimming of the level associated with the last button selected (on dimmer units)
- ‘All Off’ button provides a convenient way to switch off all buttons associated with the remote control unit
- C-Bus® Wireless Groups and Scenes can be controlled from the remote
- LCD screen and buttons incorporate a blue LED backlight
- Each control button incorporates a clear window for button labelling
- Supplied with pre-labelled stickers for identification of common areas i.e. kitchen, lounge, dining etc
- 20-25m range (typical).

C-Bus® Wireless Gateway

5800WCGA
C-Bus® Wireless Gateway

- Allows seamless communication between a wired C-Bus® network and a C-Bus® Wireless Network
- Desktop or wall mounted
- A C-Bus® Cat-5 cable connected to the wired C-Bus® network is plugged into an RJ45 socket at the rear of the Gateway
- Power for the Gateway is provided by the wired C-Bus® network, no additional power source is required
- The connection to a C-Bus® Wireless network is accomplished by a C-Bus® Learn Mode operation
- The connection to a C-Bus® Cat-5 wired network requires the use of the C-Bus® Toolkit software
- The Gateway supports routing of messages into and through both wired and wireless networks
- Messages on each network (such as button presses) can be passed through to the adjacent network.
